

## who I am

Hi, my name is **Daniel Vivar** and I'm a **senior front-end web engineer** with **+9** years of experience in businesses that range from e-health to banking.

Focused on...

- software craftsmanship,
- embracing open web standards and re-using software patterns,
- and business goals and career growth.

(full redaction at website)

## what I'm looking for

A team to lead on a company I can help grow!

Where...

- sharing and learning is encouraged,
- there's a clear focus on customer experience,
- and technology and their people is at heart.

(full redaction at website)

## what I'm good at

- Designing and building web front-end experiences with any technology
- Creating easy-to-read, maintainable, tested and scalable architectures and patterns
- Automating as much as we possibly can
- Presenting complex technologies in simple terms to any audience

(full redaction at website)
